## CAREER OBJECTIVE

---

Motivated Full Stack Developer skilled in MERN stack, passionate about building scalable web apps with clean code. Eager to contribute in agile teams and deliver impactful solutions.

## EDUCATION

---

|  |             |
|--|-------------|
| <b>Bachelor of Computer Application</b>          | 2023 - 2026 |
| Maharana Pratap College of Professional Studies. |             |
| <b>Intermediate,</b>                             | 2020 - 2021 |
| Oxford Model Convent Inter College.              |             |

## EXPERIENCE

---

|                          |                     |
|--------------------------|---------------------|
| <b>Blockchain Intern</b> | Mar 2025 - May 2025 |
| Prasunet Company         |                     |

**PeerLend – Decentralized Lending App:** Built a P2P lending platform using **Solidity**, **Hardhat**, **React.js**, **TypeScript**, and **Web3.js**. Developed smart contracts for loans and tokens, integrated with a frontend using **Ethers.js**, and indexed data via **The Graph**. Enabled secure, real-time lending without intermediaries.

## SKILLS

---

|                              |  |
|------------------------------|--|
| <b>Programming Languages</b> | C, Java, JavaScript  |
| <b>MERN Stack</b>            | MongoDB, Express.js, React.js, Node.js                     |
| <b>Additional skills</b>     | Next.js, TypeScript, Tailwind CSS, MySQL, WebSockets, APIs |
| <b>Tools</b>                 | Git, Github, Vercel, Firebase Auth, Cursor, Redis          |

## PROJECTS

---

**AI SaaS Website Builder & Dashboard.** ([Try it here](#))

- Developed a collaborative AI SaaS website builder with live cursor support, multi-user project dashboards, and Stripe Connect integration using Next.js 14, Bun, Prisma, and MySQL.
- Deployed on AWS and CloudFront for global access, real-time collaboration, and project efficiency.

**MERN Blog App with Dashboard.** ([Try it here](#))

- Built a full-featured MERN blog application with secure JWT authentication, Markdown support, intuitive admin dashboard using React.js, Node.js, Express, and MongoDB.
- Implemented Redux Toolkit for scalable state management with role-based access, content creation, user control.

## ACHIEVEMENT

---

- Participated in **HackIndia Web3 Hackathon**, building innovative blockchain-based solutions in a team setting.
- Solved **285+** DSA problems on **GeeksforGeeks**, strengthening core coding and problem-solving skills.
- Delivered clean, well-tested code across full-stack projects, ensuring high performance and reliability.

## CERTIFICATIONS

---

- **Full-stack Development.** Skilled in MERN stack, experienced in creating web apps, delivering projects, and always learning new and better techniques. ([Link](#))
- **GFG Data structure and Algorithms.** Problem-solving enthusiast with a strong foundation in DSA. Completed GeeksforGeeks'160 Days of DSA and focused on building efficient, scalable solutions. ([Link](#))
