CAREER OBJECTIVE

Motivated Full Stack Developer skilled in MERN stack, passionate about building scalable web apps with clean code. Eager to contribute in agile teams and deliver impactful solutions.

EDUCATION

Bachelor of Computer Application   2023 - 2026
Maharana Pratap College of Professional Studies.
Intermediate,   2020 - 2021
Oxford Model Convent Inter College.

EXPERIENCE

Blockchain Intern   Mar 2025 - May 2025
Prasunet Company

PeerLend – Decentralized Lending App: Built a P2P lending platform using **Solidity, Hardhat, React.js, TypeScript**, and **Web3.js**. Developed smart contracts for loans and tokens, integrated with a frontend using **Ethers.js**, and indexed data via **The Graph**. Enabled secure, real-time lending without intermediaries.

SKILLS

Programming Languages	C, Java, JavaScript
MERN Stack	MongoDB, Express.js, React.js, Node.js
Additional skills	Next.js, TypeScript, Tailwind CSS, MySQL, WebSockets, APIs
Tools	Git, Github, Vercel, Firebase Auth, Cursor, Redis

PROJECTS

AI SaaS Website Builder & Dashboard. (Try it here)

- Developed a collaborative AI SaaS website builder with live cursor support, multi-user project dashboards, and Stripe Connect integration using Next.js 14, Bun, Prisma, and MySQL.
- Deployed on AWS and CloudFront for global access, real-time collaboration, and project efficiency.

MERN menu App with admin dashboard. (Try it here)

- Built a MERN-based digital menu system with QR access, real-time updates, and responsive UI.
- Implemented secure admin authentication with role-based access and dashboard-driven menu management.
- Developed dynamic menu rendering with search, filtering, and mobile-first optimization.

ACHIEVEMENT

- Participated in **HackIndia Web3 Hackathon**, building innovative blockchain-based solutions in a team setting.
- Solved **485+** DSA problems on **GeeksforGeeks**, strengthening core coding and problem-solving skills.
- Delivered clean, well-tested code across full-stack projects, ensuring high performance and reliability.

CERTIFICATIONS

- **Full-stack Development.** Skilled in MERN stack, experienced in creating web apps, delivering projects, and always learning new and better techniques. (Link)
- **GFG Data structure and Algorithms**. Problem-solving enthusiast with a strong foundation in DSA. Completed GeeksforGeeks'160 Days of DSA and focused on building efficient, scalable solutions. (Link)
